Office Action Summary	Application No. 10/554,014	Applicant(s) FRECH ET AL.	
	Examiner Robert Rose	Art Unit 3723	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Receipt is acknowledged of Applicant's Prior Art Statement, filed October 11, 2005.
2. Receipt is acknowledged of Applicant's Foreign Priority papers, filed October 11, 2005.
3. Receipt is acknowledged of Applicant's Preliminary Amendment, filed October 11, 2005.
4. Claims 1-10 are presented for examination.
5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 2 the phrase "an eccentric sander in particular" is deemed to render the metes and bounds of the claim indefinite, in that it is unclear whether this is intended to further limit the scope of the claims. In claim 1, line 4 the phrase "the surface" is without proper antecedent support. In claim 1, line 5 the phrase "in the axial and radial direction" lacks a proper antecedent basis. In claim 9, line 4 "the cover disc" is without an antecedent basis.
7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 3723

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

8. Claims 1-2, and 4-6 are rejected under 35 U.S.C. 102(a) or (e) as being anticipated by Krondorfer et al(6780093). Krondorfer et al discloses a sanding disc receiving element for a sanding tool comprising all of the subject matter set forth in Applicant's claims above. Note bearing flange(100,304) with a plurality of driving lugs(302) with insertion bevels, and plurality of screw holes(60) arranged equidistantly on a common circle; and bearing located on shaft(18).

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Krondorfer et al('093). To form the bearing flange of a suitable plastic material in order to save weight would have amounted to no more than an obvious matter of design choice to those of ordinary skill in the art, in the absence of a showing of criticality by way of unexpected results.

11. Claims 7-10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hutchins is cited of interest to show an eccentric sander having

a sanding disc receiving element with circumferentially spaced screw holes, and housing a bearing. Chung is cited to show a sanding disc attachment comprising circumferentially spaced screw holes.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Rose whose telephone number is (571) 272-4494. The examiner can normally be reached on Monday through Thursday, and on alternate Fridays, from 8:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail, can be reached at (571) 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
